One Week Faculty Development Program On

Creating and Sharing Effective Educational Content DEC 01-05,2020

Sponsored by

A.P.J. Abdul Kalam Technical University

Organized by

Rajkiya Engineering College, Kannauj

ABOUT THE INSTITUTION:

Rajkiya Engineering College, Kannauj (RECK) is an Institute with total commitment to quality and excellence in academics. It was established by the Government of Uttar Pradesh in the year 2015. The College is affiliated to Dr. A. P. J. Abdul Kalam Technical University, Lucknow (Formerly Uttar Pradesh Technical University, Lucknow). The College offers four full time courses namely Electrical Engineering, Electronics Engineering, Civil Engineering and Computer Science & Engineering with the aim of equipping the young talents with professional education and to confer sufficient knowledge upon them to meet the demand and challenges of volatile global environment.

ABOUT THE DEPARTMENT:

The Department has dedicated faculty members for taking care of academic and other requirements of the students. It offers B. Tech. in Electronics Engineering. The Department is having well equipped labs and software for Virtual Instrumentation, PCB Design, Signal Processing, Digital Electronics lab. Etc. various extracurricular activities are regularly organized by the students Electronics department for their overall development. The Faculty members of the Department are continuously involved in quality / faculty development programs, workshops, expert lectures and R&D activities.

ABOUT THE FDP:

COVID-19 pandemic has created an unforeseen situation for teachers of higher education around the globe. Teachers in higher education usually join the teaching profession without any formal training in teaching methodology and learning psychology. Incidentally they develop teaching skills out of their own experiences or from experiences shared by colleagues in course of their teaching career. In this situation when teachers are supposed to learn and develop their own pedagogies, the challenge to create e-content becomes an uphill task. When various government schemes and policies direct us to create meaningful e-content, free from plagiarism and copyright infringement, teachers find themselves in a new footing. With the advent of enhanced graphics, data visualization tools, animations, simulations and virtual laboratories, much is to be learned by teachers, besides keeping ourselves updated with the latest developments in our domain. This Faculty Development Program intends to provide solutions to some of these challenges, so that our educators in higher education institutes are better equipped and create value added content for the students.

E-CONTENT CREATION:

- Technology-enhanced learning: Flipped classroom, use of software pedagogical aids.
- Hands-on sessions on video content creation and repurposing.

MAJOR COURSE CONTENTS:

- Guidelines for video content creation
- Types and placement of video content
- Repurposing of content
- Making effective videos
- Tools for video creation
- Flipped Learning using video content
- Forging collaborations
- Creating Learner centric environment

COURSE OBJECTIVES:

- To increase effectiveness of the young faculties in teaching
- Understand basics of creating an effective video and e-content
- To be able to create various kinds of educational videos
- To be able to repurpose existing videos on various repositories for the benefit of our students
- To be aware of different UGC Resources for online teaching learning
